Type of Artifact																																											
Brownstone concave																																												
Rio Grande concave Base																																											
Metamorphic projectile																																											
Smooth hammerstone																																											
chipped pebble hammerstones																																											
pin-like drills																																											
pitted stone																																											
forked wood haft																																											
columella pts.																																											
columella gouges																																											
shell scrapers																																											
fishhooks																																											
shell drill																																											
Bone pt.																																											
split bone awl																																											
perforated antler																																											
Shell discs																																											
shell disc blanks																																											
columella tubes																																											
Shell plugs rounded																																											
shell plugs rectangular																																											
Olivella shell beads																																											
Triangular olivella ampl. pendants																																											
Rectangular pendants																																											
long rectangular pendants																																											
Square pendants																																											
rectangular cut shell																																											
Bivalve shell ornaments																																											
Tinklers																																											
cut hammer/saw																																											
carved bone ornament																																											
Potsherd, unidentifiable																																											
Painted pottery, probably Lamar																																											
Engraved pottery, probably Lamar																																											
very small Dpp.																																											
glass PP																																											
columella drill																																											
perforated conch																																											
Flake scrapers																																											
Abassie round base PP																																											
columella (not undrilled)																																											
Conical pumice pipe																																											
Small shell beads																																											
Bi-valve beads																																											
red ochre																																											
engraved stone																																											
marginella beads																																											
Bone bead																																											
drilled columella pendant																																											
pierced conch																																											
tubular clay pipe																																											
Tortuges triangular PP
